

**Snells
Conservation**

The latest edition of Forest and Birds national magazine featured an article by Jackie Russell about how the F&B Warkworth Branch's project to protect tuturiwharu (Dotterels) at Snells Beach was bearing fruit.

The project team are pleased to report that in the last tuturiwharu breeding season five (5) chicks were banded before they fledged. The team were very excited about the experience and the outcomes. The article can be read on full in your local library or get your own personal copy by becoming a member.

Support Snells Conservation

If you'd like to financially support Snells Conservation please donate to the [Forest & Bird Warkworth Area](#) bank account. 38 9020 0129881 00 **Please be sure to put SC in the reference, and your name in the particulars.**
